GROCERY DATABASE

Abstract

Shopping online alleviates the need to walk up and down store aisles. And you can log in any time—even at 2 am—and still have the advantage of a fully stocked store. Plus, going the delivery route saves you a trip to the store, which not only saves time, but gas money as well. In fact, studies show grocery delivery services slash carbon dioxide emissions in half compared to individual household trips.

Advantages of Online Grocery Shopping

1. It saves time. Shopping online alleviates the need to walk up and down store aisles. ...
2. No Unwanted Luxury Purchases. ...
3. Find Everything You Need. ...
4. You Can't Personally Look at Items. ...
5. Delivery can be a challenge. ...
6. Price.
7. It saves time

No Unwanted Luxury Purchases

It’s far too easy to do; you’re walking around the shop grabbing all the items you need and suddenly a chocolate cake, packet of biscuits, and some sausage rolls have somehow found their way into your trolley. You didn’t want them before but now you’ve seen them you need them! Shopping online can help you tame the impulse buying within you.

Comparisons

Many online stores have an invaluable feature that will make the lives of countless housewives a hundred times simpler – the feature of price comparison. Online shopping does not compel you to remember how much more expensive eggs are in store A versus store B.

Find Everything You Need

Search engines on websites make it much easier to find items quickly; typing in the name or brand of a product will show you all relevant products making it much easier to find exactly what you need.

FRONT-END

Login page

Visiting the website

When a new user has visited the website then they will just see the groceries that are present on the store and they can browse the categories present over there.

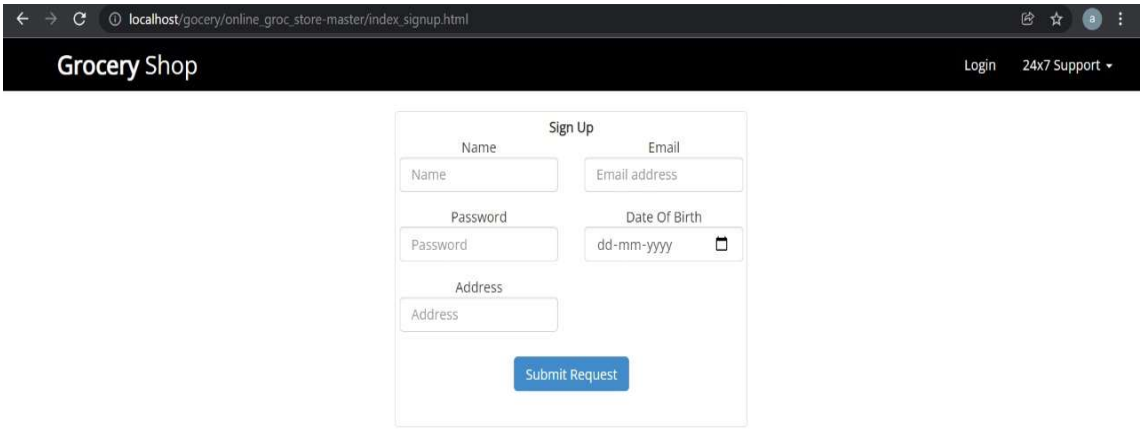
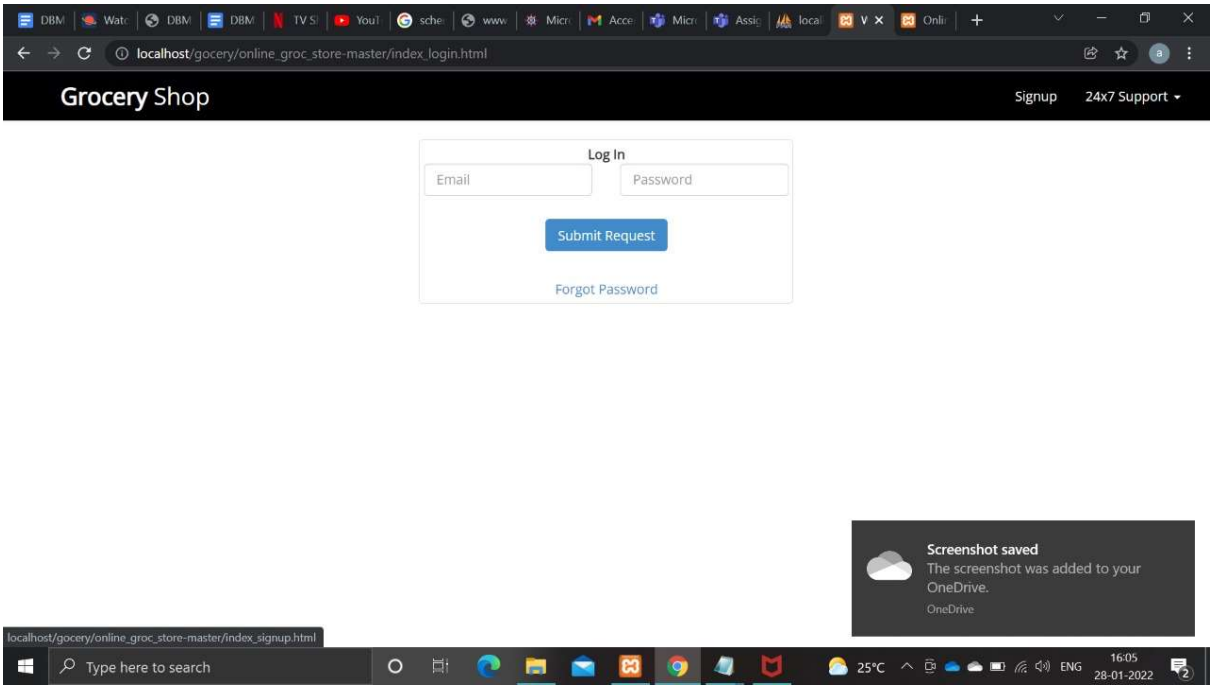
When a new user enters the company's website to shop, the user won't be having an account initially, so we need to sign up for the website.

Sign up page for our website Grocery shop

New user has to enter Name, Email, Password, date of birth and address

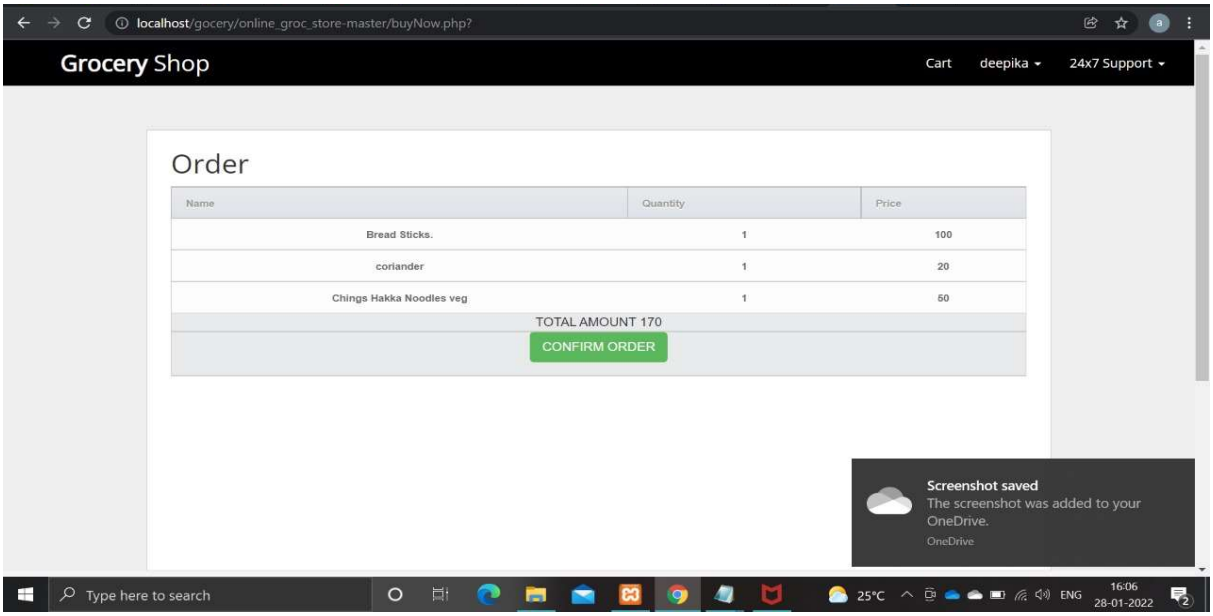


If the user already has an account, then they can just directly go to the login page and enter the asked details like email and password

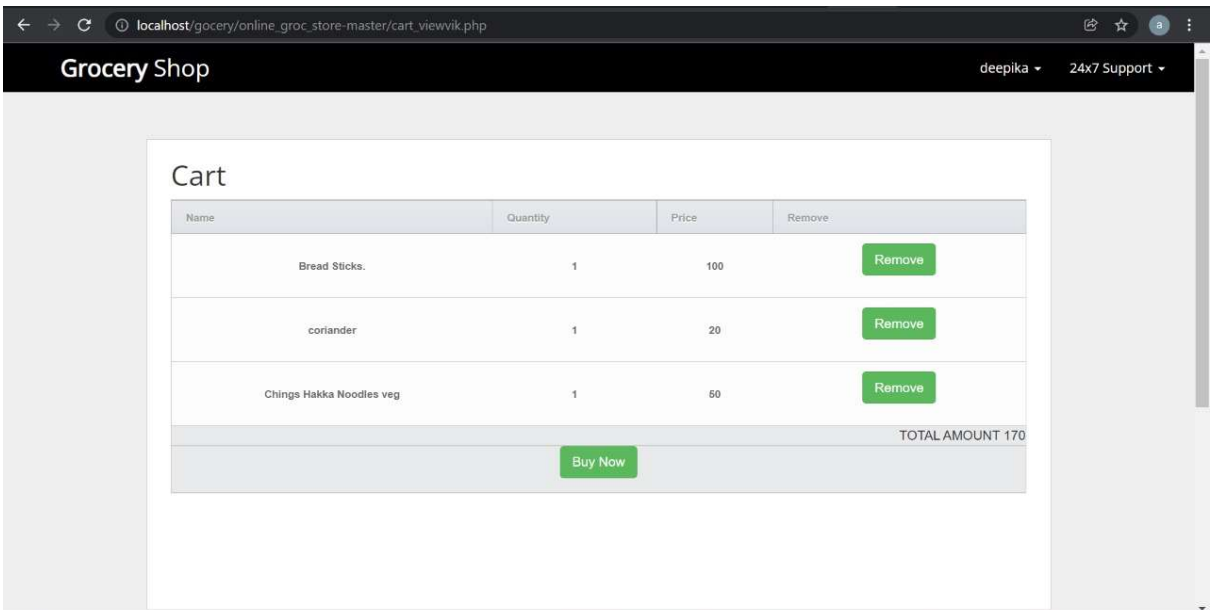


After logging in the user is able to buy the products they want.

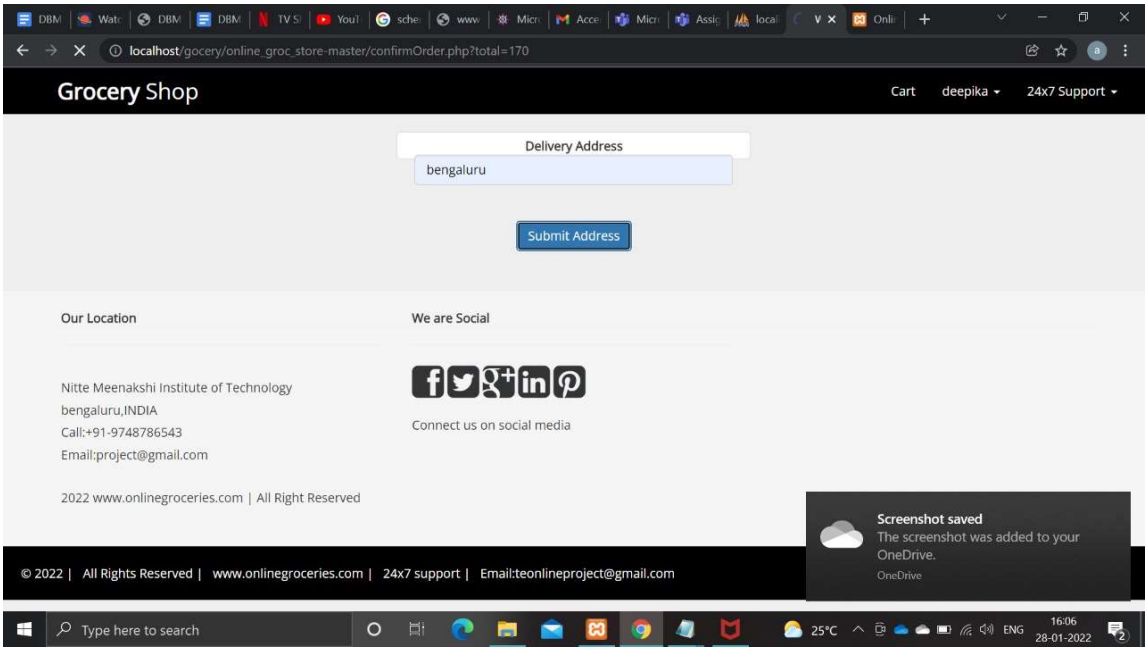
Users can select the products they want and the order details will be displayed as follows,



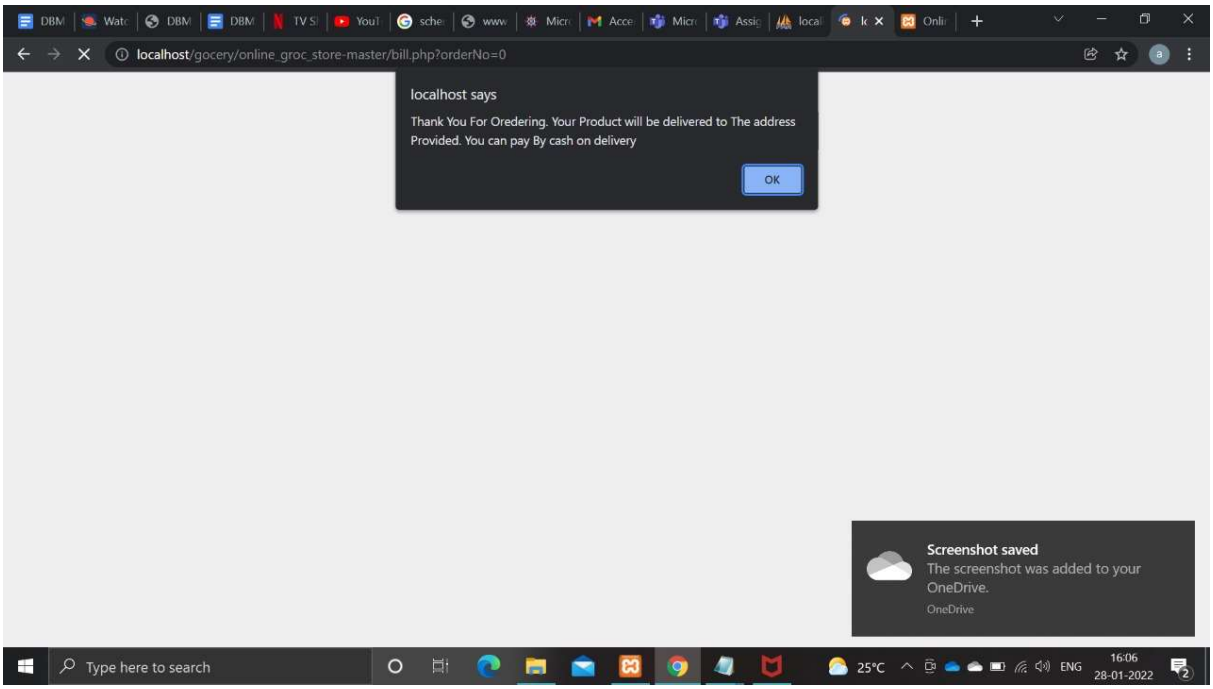
Users can go to the cart and verify the products like they can add the products , remove the products.



Then users can add the delivery address and submit the address.

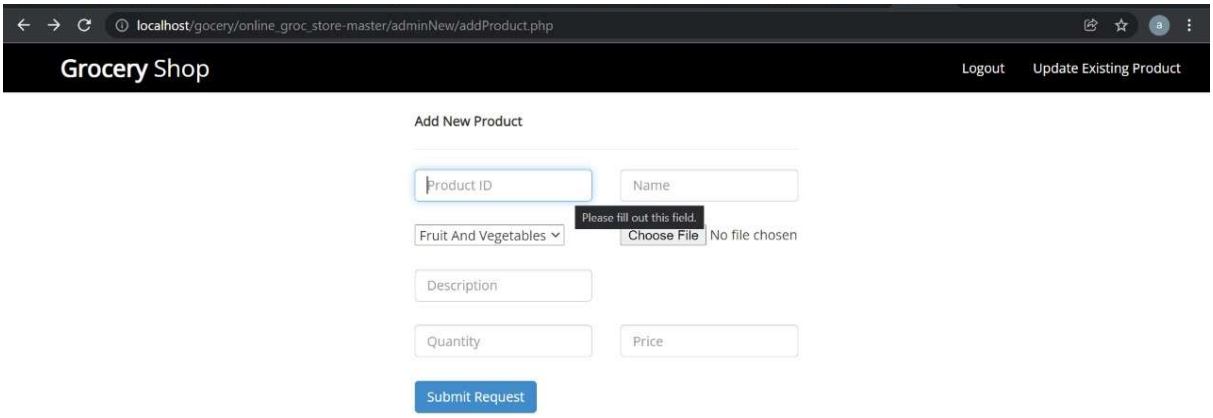


After confirming the address and verifying the products the pages give a message saying thank you for shopping on the site



If the store manager wants to add the groceries or needs to update the groceries they can do so using the new product section.

Here they ask for details like product id ,name of the product , description of the product, choosing the picture of the product, quantity how much is available , price of the product.



Here it shows how we can update the products quantity and price of the product.

```

Back end

We did the backend using PHPMYADMIN .

The main purpose of phpMyAdmin is to handle the administration of MySQL over the web. It is the most popular application for MySQL database management. We can create, update, drop, alter, delete, import, and export MySQL database tables by using this software.
